Freedom DE08L Powerchair

The Freedom DE08L has a cleverly designed frame which separates into two manageable sections with the heaviest part being 15.5kg, making it easy to disassemble for travel and transport. It's flight ready, with lithium batteries approved for airline travel.

The DE08L retains the classic sturdiness of the Freedom Chairs and allows you to drive on uneven surfaces such as gravel and grass. It can turn on its own axis, boasts front wheel suspension and two powerful 250W continuous/300W peak brushless motors with electromagnetic braking.

Flip-up armrests - transfer easily and draw up close to a table.

USB & LED Light - Top up your smart phone or light up the path ahead.

Under-seat storage provides a handy and secure place for your belongings.
