Advice for Carer			
	<ol style="list-style-type: none">1. Safely assist or lift the person from the floor Before you lift the person:<ul style="list-style-type: none">> If there are signs of deterioration, select 'Start Again' to re-assess.> This guidance covers most, but not every possible, post falls scenario. If there are other clinical concerns, discuss whether it is safe to lift the person with a senior member of staff.2. Where possible, observe the person for at least 24 hours for any new symptoms
