VENDLET V5S Turning System

Repositioning has been redefined.

Brought to the UK by Felgains, the VENDLET V5S Turning System has the ability to transform today's time and labour intensive care provision.

This unique system is based on a motorised turning sheet which can be operated by one carer.

Key benefits

Reduced care handling

Patients can be turned or repositioned by one carer, providing efficient resource management not found in standard positioning solutions.

Improved tissue viability

Using VENDLET V5S virtually eliminates shear and friction.

Mechanisation of turning

Potential muscular-skeletal injuries are minimised with significant savings in cost and inconvenience.

Service user comfort and dignity

Carers no longer need to be so 'hands on' so care is less intrusive.

How is the VENDLET V5S used?

- Turning & repositioning to lateral, prone or supine positions for care procedures including personal hygiene and sling application.
- Moving service users from one side of the bed to other.
- Repositioning service users up the bed where they have moved down due to bed profiling.

What makes the VENDLET V5S unique?

- Unrivalled functionality & versatility
- Fully operable from one side of the bed
- Plus-size version available
- Compliant to all anti-entrapment regulations
- NEW integral siderails (BSEN 60601-2-52 compliant)
- NEW speed adjustment function

FAQs

Does the VENDLET V5S prevent the profiling bed from being used?

No, full functionality is retained.

Can the VENDLET V5S be used on an air mattress?

Yes, it is compatible with all mattresses.

Can I buy disposable sheets?

Yes, disposable sheets are available.

Can I lease the VENDLET V5S?

Yes, 3-year and 5-year leases are available as an alternative to outright purchase or rental.

How can I calculate cost savings?

We can provide this using our Ready Reckoner tool.
